

Collaborations:

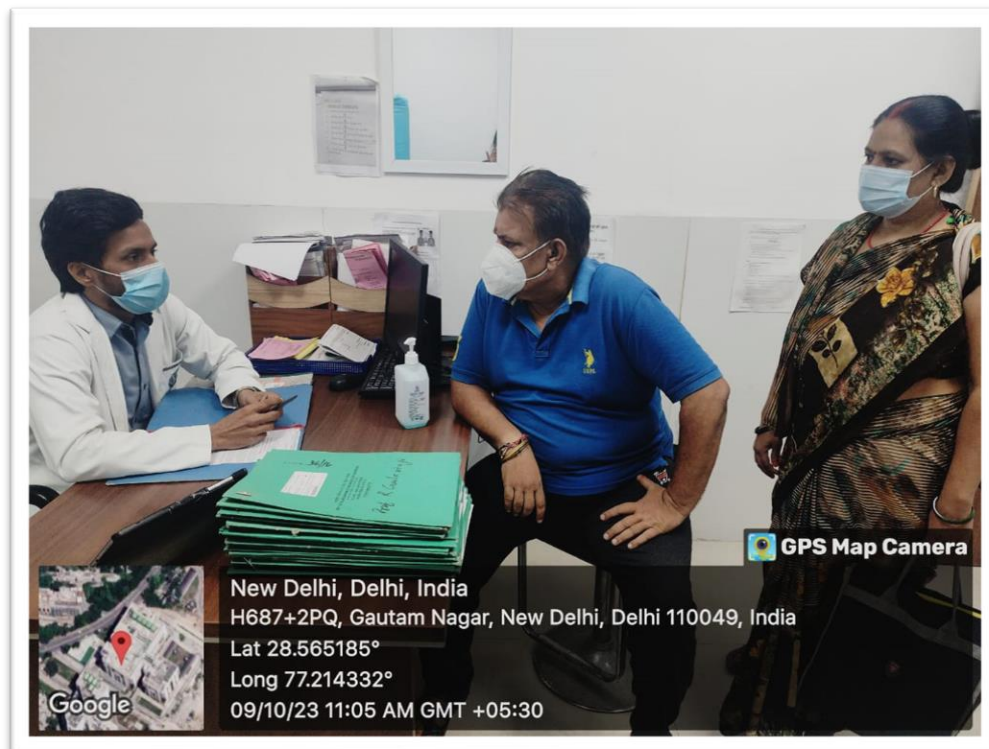

Collaboration between Department of Anthropology and Indian Establishments

The Department of Anthropology has been actively engaged in fruitful collaborations with esteemed Indian establishments, such as the Indian Council of Medical Research (ICMR), All India Institute of Medical Sciences (AIIMS), Department of Biotechnology (DBT), and Department of Science and Technology (DST).

These collaborations have yielded significant advancements in various fields. Through its partnership with ICMR, the Department of Anthropology has contributed to vital research on public health, genetic studies, and epidemiology. The collaboration with AIIMS has facilitated the exploration of healthcare disparities, medical anthropology, and the impact of culture on health outcomes.

The collaboration with DBT has led to breakthroughs in the study of human evolution, genetics, and genomics. Moreover, through its partnership with DST, the Department has enhanced its research capabilities in areas like social anthropology and ethnography. These collaborations have not only broadened the horizons of the Department of Anthropology but have also contributed to the growth and development of the Indian scientific community. By pooling expertise and resources, these partnerships have fostered interdisciplinary research, improved public health policies, and enriched our understanding of human diversity and cultural dynamics.

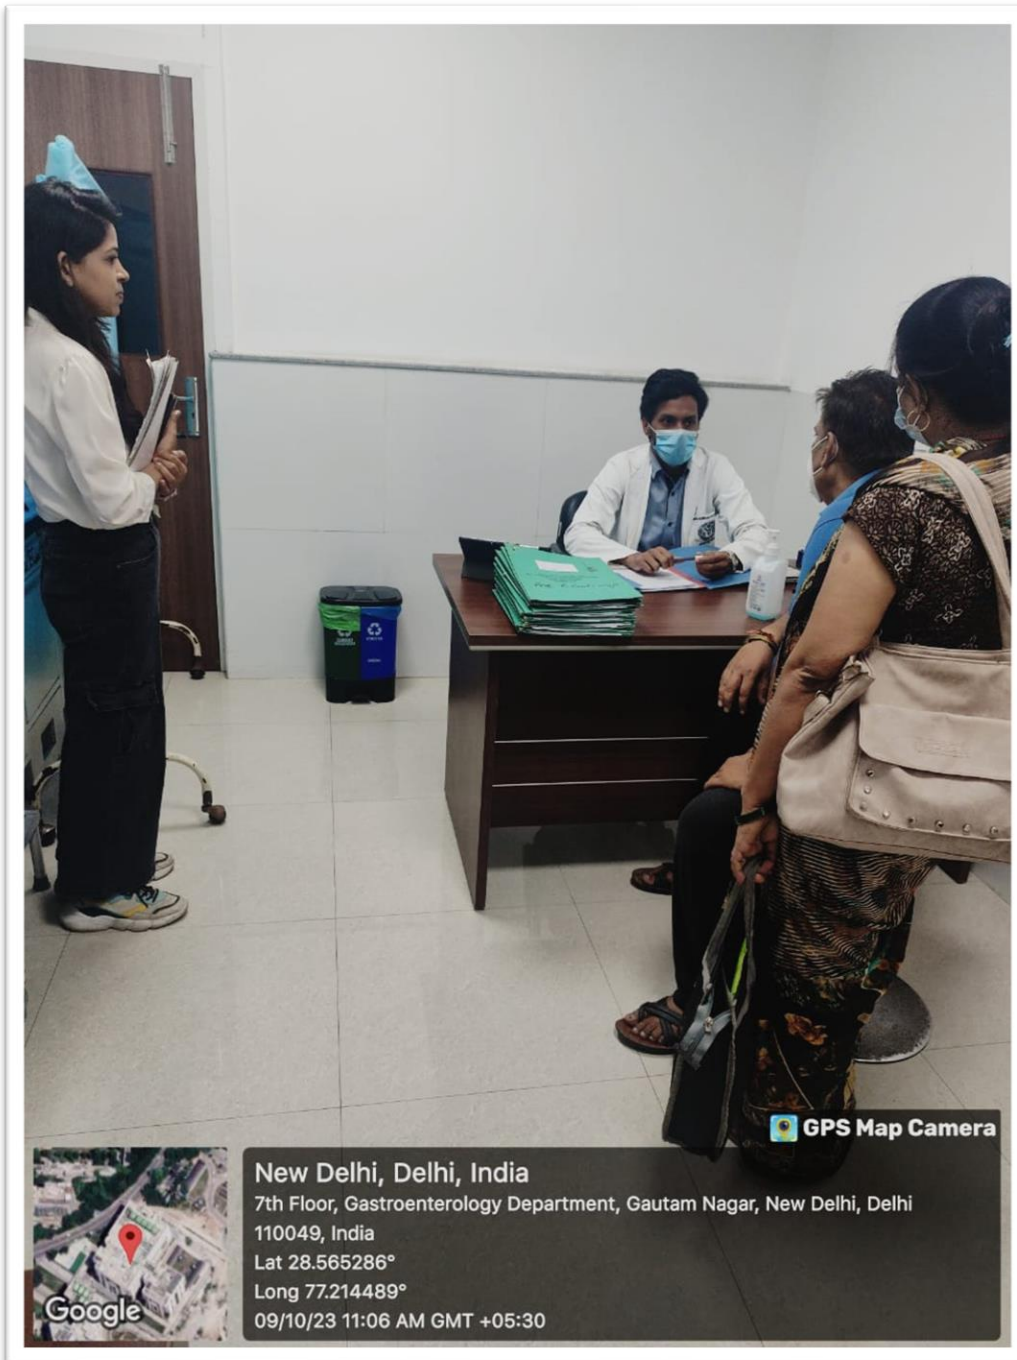

These collaborations between the Department of Anthropology and Indian establishments, including ICMR, AIIMS, DBT, DST, and others, have been instrumental in advancing knowledge, addressing critical societal issues, and promoting scientific excellence in the field of anthropology.
